

## WHY TPMS-SERVICE KITS?

When a tyre is replaced on a vehicle without TPMS, it is normal to replace the rubber valve. In the case of a direct TPMS system, some components of the sensor must also be replaced. Every time a tyre is replaced, the suitable TPMS Service Kit must be used to replace the wear parts (nut, O-ring, nickel plated valve core, cap). This ensures safety, prevents breakdowns and avoids larger and more expensive consequential damages (For example a complete replacement of the sensor because the valve core is stucked by corrosion).

## WHY HOFMANN POWER WEIGHT?

- **100 % vehicle coverage**  
Hofmann Power Weight is the only supplier providing a 100% coverage for all European vehicles from 2014 on.
- **Highest OE-quality**  
Spare parts in OE quality guarantee best work results and maximum reliability even under extreme conditions.
- **Latest corrosion protection technology**  
All metal components are treated with the latest corrosion protection technology for highest demands.
- **Reduced stock-keeping**  
Demand-optimized box filling for efficient warehousing.
